**Nox Medical** is a leading provider in the field of sleep diagnostic solutions that build on decades of experience in providing industry standard solutions for sleep monitoring and diagnostics as well as bleeding edge technology. Our main goal is to bring to market a new generation of products to support the growth of sleep medicine.

**Nox A1s™ and Nox T3s™**, our flagship products are revolutionary sleep monitors, based on the latest innovations in wireless, memory, sensors, and electronic technology. These recording devices are compact, lightweight and easy to use.

**Nox Recording Devices** have been engineered and designed to record and analyze sleep disorders in children as well as adults. With the monitors we have managed to remove as many sensor leads as possible since the patient's comfort is the key element for good sleep recording.

Combining **Nox Recording Devices** with the powerful Noxturnal software unleashes the full potential of the Nox systems. Offering automatic analysis, scoring and reporting, Noxturnal greatly simplifies the task of preparing a sleep study for the correct interpretation by the physicians.

**Nox Medical** will always aim to proactively satisfy its customers' needs. The customer service representatives are trained to handle customer requests promptly and professionally. Personalized customer service, along with prompt delivery, are major priorities in keeping commitments to customers.
