

Software and Firmware Update

Release of Noxturnal 7.1

At Nox Medical, we are committed to continuous innovation and excellence. With the release of our latest Noxturnal 7.1 update, you will discover performance improvements and new advanced features, all crafted to enhance your experience with Nox Medical's sleep diagnostic technology.

Noxturnal 7.1 contains updates of the following:

- Noxturnal Software
- Noxturnal Language Pack
- Nox T3s Firmware
- Nox A1s Firmware
- Nox C1 firmware

Main updates include:

- New feature: Ability to start a recording by attaching the Nox RIP belt.
- Nox SAS integration enhancement including an updated EEG Frontal Filter.
- New feature: Ability to wake Nox A1s via Bluetooth.
- Important stability improvements and enhancements

DISCLAIMER: To take advantage of these new features, update to Noxturnal 7.1 and ensure your Nox A1s, T3s, and C1 are updated to the latest firmware. See the release bulletin for a compatibility guide.
