Software Updates

Noxturnal 7.1.1 Update

The latest Noxturnal release is here! Noxturnal 7.1.1 brings important improvements based on user feedback, especially for scenarios with multi-site setup and large datasets.

Key Enhancements Include:

- **Improved indexing:** Prevents freezing when navigating the recording library.
- **Better bulk study management:** Smoother handling when moving large numbers of studies between folders.
- **Enhanced study archiving:** Reduces the risk of data loss during archiving.
- **Stronger network stability:** Minimizes the chance of lost scoring due to connection issues.

Additionally, **Noxturnal Manual v. 4.4** now includes updated cybersecurity guidelines to help you protect your data.
