

Software Updates

Noxturnal US 7.1.1 Update

The latest Noxturnal release is here! Noxturnal 7.1.1 brings important improvements based on user feedback, especially for scenarios with multi-site setup and large datasets.

New Sleep Time Tool

The Sleep Time Tool is designed to help clinicians refine their sleep study analyses by offering an intuitive way to manually review and update Total Sleep Time (TST) calculations. The tool allows for more clinically precise results by incorporating supplementary data, such as body position and other relevant factors.

Key Enhancements Include:

- **Improved indexing:** Prevents freezing when navigating the recording library.
- **Better bulk study management:** Smoother handling when moving large numbers of studies between folders.
- **Enhanced study archiving:** Reduces the risk of data loss during archiving.
- **Stronger network stability:** Minimizes the chance of lost scoring due to connection issues.
- **Optimized Nox Connect interaction:** Improved stability for cloud platform users.

Additionally, **Noxturnal Manual v. 4.4** now includes updated cybersecurity guidelines to help you protect your data.
